

A technical line drawing showing a cable assembly connected to a component. The assembly includes a braided shielded cable with a connector. A label 'MB991885' points to the connector. Another label 'Lap pre-tensioner' points to a rectangular component on the cable. The drawing shows the cable entering a rectangular housing with a circular opening. A vertical rod is also shown passing through the housing. The background shows a partial view of a person's head and neck.
