

Timing belt
tensioner arm

This technical drawing shows a timing belt tensioner arm assembly. The main component is a curved arm with a central pivot point. A timing belt is shown wrapped around a pulley on the arm, with dashed lines indicating its path. The arm is mounted to a bracket with several bolts. A callout line points to a specific bolt on the arm, and another callout line points to a bolt on the bracket. The drawing is a black and white line drawing.
