

MD998772

This technical drawing shows a mechanical assembly, likely a valve train component. A long, thin metal bar is positioned horizontally across the top of the assembly. It is supported by several vertical components, including a large spring on the left and a smaller spring on the right. A callout line points from the text 'MD998772' to the bar. Below the bar, there are various mechanical parts, including what appears to be a camshaft and a valve. A callout line points from the text 'AC301867AB' to a specific component on the right side of the assembly.
