

Inlet manifold

The diagram shows a technical drawing of a mechanical assembly. At the top, a curved component labeled 'Inlet manifold' is shown. Below it, a long, angled component is shown, which is part of a 'Cylinder block'. Two arrows point to specific features: one points to a rectangular protrusion on the upper surface of the angled component, and the other points to a cylindrical protrusion on the lower surface. The drawing uses solid lines for visible parts and dashed lines for hidden internal features. The overall layout is a side-view cross-section of the assembly.
