

A technical line drawing of an engine piston assembly. The piston is positioned within the cylinder bore. A hand is shown applying a strip of Plastigage to the piston rings. Another hand is using a screwdriver to rotate the crankshaft, which causes the rings to compress the Plastigage. The word "Plastigage" is written in the upper left area of the drawing, with a line pointing to the strip. The drawing is a black and white line art illustration.

Plastigage
