

Fuel high-pressure
hose

The diagram shows a cross-section of a fuel high-pressure hose being inserted into a plastic retainer. The hose has a braided outer layer and a smooth inner tube. The retainer is a rectangular plastic component with a central opening for the hose. A fuel delivery pipe is shown extending from the retainer. A black arrow points to the bottom edge of the retainer, indicating a specific feature or direction of assembly. A bolt is visible in the background on the left side of the diagram.
