

A detailed line drawing of an engine compartment, viewed from a top-down perspective. The drawing shows various engine components, including the intake manifold, throttle body, and various hoses and wires. A specific sensor is highlighted with a thick black outline and a leader line pointing to it from the text. The sensor is located in the EGR (Exhaust Gas Recirculation) system. The text 'EGR gas temperature sensor' is positioned to the right of the sensor. The drawing is a technical illustration, likely from a service manual.
