Simplified troubleshooting flow chart

Is the communication with M.U.T.-III possible? → No →
· Battery failure
· Malfunction of the CAN-C/CAN-C-Mid bus line
· Malfunction of ETACS-ECU (power supply, earth system)
· Malfunction of OSS-ECU (power supply, earth system)

Yes ↓

Is the diagnosis code set? → No

Yes ↓

Carry out the OSS-ECU check by diagnosis code.
(With the forcible power supply output using the M.U.T.-III, distinction from failure of another systems is possible.)

Is it possible to turn ON the power when the keyless operation key is placed in the key box? → No

Yes ↓

Diagnose the KOS-ECU.
· Low battery voltage of keyless operation key, etc.

Carry out the OSS-ECU check by trouble symptom.
· Power does not turn on.
(not possible with both of power supply mode ACC and ON)
