

Hood hinge

The diagram shows a hood hinge assembly. A vertical hinge plate is attached to the hood, and a horizontal hinge plate is attached to the engine compartment. The horizontal plate has two circular mounting points. Three arrows point to these points: one points to the top one, one to the bottom one, and a larger, multi-headed arrow points to the space between them, indicating movement. A leader line points from the text 'Hood hinge' to the top of the vertical hinge plate.
