

A technical line drawing of a seat belt pre-tensioner harness side connector. The drawing shows a complex assembly of metal and plastic parts. A flat-tipped screwdriver is shown inserted into a slot on the left side of the assembly. A locking button is located at the top of the assembly. The entire assembly is mounted on a metal plate with various holes and slots. The drawing is a black and white line art illustration.

**Flat-tipped
screwdriver**

Locking button
