

A technical line drawing showing a fuel tank assembly and a transmission jack. The fuel tank is a large, rectangular component with a curved top and a mounting bracket on its side. The transmission jack is a mechanical device with a central vertical post, a horizontal base, and two large, gear-like adjustment wheels. A line points from the text 'Fuel tank assembly' to the top of the tank. Another line points from the text 'Transmission jack' to the base of the jack. The diagram is set against a background of diagonal lines representing a vehicle's chassis.

Fuel tank assembly

Transmission jack
