

The diagram illustrates a two-step assembly process. In the top row, a curved metal component with a hook-like end is shown on the left. On the right, the same component is shown with a small L-shaped piece being inserted into a slot at its top. An arrow points from a syringe-like applicator to this L-shaped piece. A large downward-pointing arrow is centered between the top and bottom rows. In the bottom row, the assembly is complete. The L-shaped piece is now fully seated in the slot. A label 'Dust cover' with an arrow points to a small circular cap on the top of the L-shaped piece. Another label 'Retainer' with an arrow points to the L-shaped piece itself.
