

A technical drawing showing a cross-section of a mechanical assembly. At the top is a large, rounded rectangular component. Below it are two vertical cylindrical components, each with a semi-circular groove on its top surface. These two cylinders are connected to a central horizontal shaft. The entire assembly is mounted on a base consisting of two rectangular blocks. Two labels with leader lines point to specific parts: 'MB990881' points to a small circular feature on the top of the left cylinder, and 'Trailing arm bushing' points to a component on the right side of the assembly.
