

A technical line drawing showing the installation of an air bag module connector. The diagram illustrates the connector being inserted into a housing on the instrument panel wiring harness. A black arrow points to the insertion point. The connector is connected to a bundle of wires. The entire assembly is mounted to a metal crossmember. Labels with leader lines identify the 'Air bag module connector', 'Outer housing of the instrument panel wiring harness connector', and 'Front deck crossmember'. A small circular detail is shown at the bottom center of the diagram.
