

Timing marks

The diagram shows a technical drawing of an engine component, likely a timing cover or crankcase. A central circular flange is the primary focus, featuring eight evenly spaced circular holes around its perimeter. Two small triangles on the left side of the flange indicate timing marks. A pointer from the text 'Timing marks' points to these triangles. Another pointer from the text 'Flange' points to the outer edge of the central circular component. The surrounding area shows various mechanical parts, including bolts and structural beams, all rendered in a clean, black-and-white line-art style.
