

A technical line drawing showing a hand holding a long-handled tool, possibly a screwdriver or a similar instrument, and applying it to a circular component of a larger mechanical assembly. The circular component has a serrated or ribbed edge. The drawing is a black and white line art style, typical of technical manuals. The hand is positioned at the top left, and the tool extends diagonally across the frame. The mechanical part being worked on is a complex assembly with various bolts, nuts, and structural elements. The overall scene is a close-up of a manual operation.
