

A technical line drawing of an engine's timing belt and camshaft sprocket assembly. The diagram shows a timing belt with a series of teeth, mounted on a camshaft sprocket. The camshaft sprocket is a large gear with a specific profile, and the timing belt is looped around it. The assembly is shown in a cross-sectional view, revealing the internal components of the engine block. The timing belt is shown in a curved position, indicating its path around the camshaft sprocket. The camshaft sprocket is mounted on the camshaft, which is visible in the background. The timing belt is shown with a series of teeth, and the camshaft sprocket is shown with a specific profile. The diagram is labeled with 'Camshaft sprocket' and 'Timing marks'.
