

Slit

The diagram shows a top-down view of a mechanical component, likely a bearing housing. It features a central bore with a hexagonal hole. A vertical slit is cut into the inner ring of the bore. An oil channel hole is located on the outer ring of the bore. The component is mounted on a larger housing with several circular holes. The labels 'Slit' and 'Oil channel hole' are positioned to the left of the component, with arrows pointing to the respective features.
