

Right bank
oxygen sensor (rear)
connector

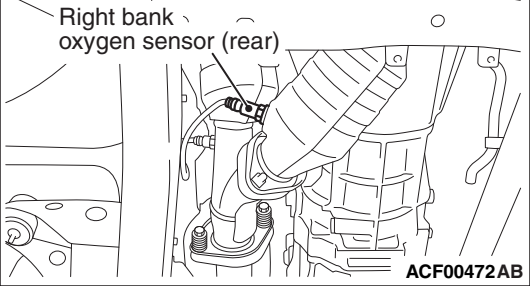

Shock absorber
assembly (RH)

This diagram shows the rear engine compartment. A four-pin connector is labeled as the 'Right bank oxygen sensor (rear) connector'. A line points from this connector to the sensor on the engine. Another line points to the 'Shock absorber assembly (RH)' on the right side of the engine.

Equipment side
connector

This diagram shows a close-up of the 'Equipment side connector', which is a four-pin connector with terminals numbered 1, 2, 3, and 4.

Right bank
oxygen sensor (rear)

This diagram shows a close-up of the 'Right bank oxygen sensor (rear)' installed on the engine. A line points from the label to the sensor.
