

A detailed line drawing of an engine's internal components, specifically the intake manifold and valve train. A large, curved intake manifold is the central focus. A valve train assembly, including a camshaft and various valves, is shown in the upper right. A specific valve mechanism is highlighted with a thick black outline, indicating it is the subject of the diagram. The drawing is a technical illustration, likely from a service manual.

**EGR valve (with  
built-in EGR valve  
position sensor)**
