

A technical line drawing of a vehicle chassis component, likely a front suspension crossmember assembly. The drawing shows a long, cylindrical metal bar with various mounting points and a U-shaped bracket at one end. A rectangular oil pan is mounted on top of the bar. A wood chip is shown being inserted into a slot in the bar. The drawing is annotated with three callout lines pointing to specific parts: 'Oil pan' points to the rectangular component, 'Wood chip' points to the chip being inserted into a slot, and 'Front suspension front crossmember assembly' points to the main cylindrical bar.
