

Coil spring end

The diagram shows a vertical assembly. At the top is a threaded rod with a conical top. Below it is a cylindrical component with a flange. A coil spring is wrapped around this central rod. The bottom of the spring is attached to a horizontal plate. A cylindrical component, labeled 'Spring seat', is positioned between the bottom of the spring and the horizontal plate. A label 'Coil spring end' points to the bottom of the spring, and a label 'Spring seat' points to the cylindrical component.

Spring seat
