

A technical line drawing of a vehicle chassis component, likely a front suspension crossmember assembly. The drawing shows a long, cylindrical component with various mounting points and a rectangular pan-like structure. Callout lines point to specific parts: 'Oil pan' points to a circular feature on the top surface, 'Wood chip' points to a rectangular pan-like structure, and 'Front suspension front crossmember assembly' points to the main cylindrical component. The drawing is a black and white line art illustration.
